RE: Medical and Defense Manufacturing Critical Support Services

Governor Charlie Baker (MA) as well as other state and local governments have recently issued stay at home orders for all non-essential businesses and employees. These orders grant exceptions to 'essential' businesses and their employees.

CSC Force Measurement provides equipment, support, calibration, and repair services of specialized equipment with a majority client base in the medical and defense manufacturing industries. We believe that these industries and our role servicing them are critical to the health and safety during this time.

CSC Force Measurement has been contacted by a number of our clients in these industries seeking to confirm our continued operations and communicate the necessities of the services that are provided to them. As such, CSC Force Measurement is deeming itself as an essential and critical business to further the medical and defense manufacturing industries.

Please be advised that during this time, **CSC Force Measurement will remain open and provide services to our customers so as not to disrupt critical supply chains.**

Sincerely,

C.S.C. Force Measurement, Inc.

Thomas Murray
President
